1. Gerede

$$M = 1$$
 $Y = x + 5$

Porlet

 $(0,0)$
 $(1,1)$
 $1 = 1 + 5 = 0$
 $5 = 0$
 $1 = 1 + 5 = 0$

1. Gerade

$$\alpha = \frac{Ay}{Ax} = \frac{5-1}{3-1} = \frac{4}{1}$$
 $= 2 = 0 = 0 = 0 = 0 = 0$

Pull

 $(1,1) = 2 + 6$
 $(1,1) = 0 = 0 = 0$
 $(1,1) = 0 = 0$

3. Gerede

$$s = \frac{A7}{0 \times} = \frac{-5}{2}$$

 $y = -\frac{5}{2} \times + 6$
Portet
 $(0,6)$ $0 = -\frac{5}{2}.515$
